

Frederick Colbourne

Citizenship: UK and Canada

E-mail: fredcolbourne@hotmail.com; fredcolbourne@gmail.com

Fred Colbourne has more than 30 years experience in developing countries as economist/financial analyst. His credentials as a financial economist include long-term assignments in Southeast Asia, Egypt and the Middle East, and shorter assignments in Latin America, Africa and South Asia.

He is experienced in conceptualizing and integrating financial, institutional, and socio-economic aspects of urban and rural infrastructure projects and programs; preparing investment programs, including loan documents for submission to the World Bank and the ADB, financial projections and accounts; and financial and institutional aspects of private sector participation.

He has prepared public-private partnerships (PPP) for water supply concessions and water conveyance in Indonesia, including a computer program for evaluating bids by international water companies. He has prepared and analyzed social/market surveys for water supply, airports, water demand and urban development. Recently, his assignments have included policy formulation, regulatory reform, sector planning and project evaluation.

Economic sectors: Infrastructure development (urban, rural & community), water, solid & human waste, irrigation, industry, and environment.
